Directions (14-18): In each question below is given a group of letters followed by four combinations of digits/symbols numbered 1), 2), 3) and 4). You have to find out which of the combinations correctly represents the group of letters based on the following coding system and the conditions that follow and mark the number of that combination as your answer. If none of the combinations correctly represents the group of letters, mark 5) ie 'None of these', as your answer.

Directions (51-55): In each of these questions a group of letters is given followed by four Combinations of number/symbol numbered 1), 2), 3) & 4). Letters are to be coded as per the scheme and conditions given below. You have to find out the serial number of the combination which represents the letter group. The serial number of that combination is your answer. If none of the combinations is correct, your answer is 5), i.e. 'None of these'.

Letter	E	Q	В	K	N	P	L	Ι	T	С	S	F	Н	W	A
Digit	5	*	\$	2	©	#	4	9	@	6	1	8	%	7	3

Conditions:

i. If the first letter is a consonant and the last a vowel, both are to be coded as the code for the vowel.

Reasoning: Coding and Decoding

- ii. If the first letter is a vowel and the last a consonant, the codes for the two are to be interchanged.
- iii. If both the first and the last letters are consonants, both are to be coded as '§'.
- iv. If there are more than two vowels in the group of letters, all vowels are to be coded as '£'.

Additional Examples

Directions (1-3): In each of the questions given below, a group of digits are given followed by. Four combinations of letters numbered (1), (2), (3) and (4). You have to find out which of the four combinations correctly represents the group of digits below. If none of the four combinations represents the group of digits correctly, give (5) i.e. "None" as the answer.

Digit: 921753648

Letter: B V M L D P A F R

Conditions for coding the group of digits:

- (i) If the last as well as the fourth digits are even, both are to be coded by the code for the first digits.
- (ii) If the first as well as the second digits are odd, both codes are to be interchanged.
